FOR IMMEDIATE RELEASE

SMALL BUSINESS DAMAGE REPORTING

ST. LOUIS COUNTY – Effective today, the St. Louis County Police Office of Emergency Management will start functioning as the repository for small business damage reporting. Small Business owners can submit their report directly by emailing eocgeneral@stlouiscountymo.gov. The following information should be included: business name, business address, contact information to include email, description of the damage and an estimate if available.

Once compiled, this information will be forwarded to the Missouri State Emergency Management Agency for review. If further information is needed, a team member will reach out to the business. Business owners should still follow the process of documenting their damage and contacting their insurance company.

Individual homeowners can continue to submit their damage reports by filling out the 2-1-1 United Way Disaster Intake Form at 211helps.org.
